

PRESS RELEASE

ARNEG ALONGSIDE DESPAR NORD: NEW STORE OPENED IN PIAZZA CAVANA

Tailor-made technology, respect for the context and a shared idea of sustainability.

Trieste, 7 August 2025 - A new store signed Despar Nord - Aspiag Service S.r.l. was inaugurated today in Piazza Cavana, one of the most picturesque corners of Trieste's historic centre. A project that combines tradition and innovation thanks to the synergy with Arneg, a reference company in the commercial refrigeration sector.

The new opening is part of an urban regeneration process that restores the historic building to its original commercial vocation, in full respect of the architectural and cultural identity of the place. It is a concrete example of how retail can establish a virtuous dialogue with the urban heritage, generating value for the area and improving the shopping experience. The new shop is thus configured as an authentic social space: a place of connection and aggregation for the community.

Tailor-made technology for a unique context

Arneg accompanied Despar Nord at every stage of the project, transforming architectural complexities into opportunities through tailor-made design solutions.

Arneg's experience and vision guaranteed high-level performance, maximum energy efficiency and strict compliance with historical-architectural constraints.

The solutions, perfectly integrated and designed to harmonise with the spaces, combine elegance and sustainability, ensuring a measured but highly refined aesthetic impact. Not mere technologies, but design tools that enhance the memory of the place and offer a contemporary and welcoming shopping experience.

'We have designed solutions that combine design and technology, in full respect of the historical context' - says Marco Foralosso, Key Account Manager of Arneg S.p.A. - 'This project represents a perfect balance between tradition and innovation: we are proud to have contributed to giving new life to a symbolic place in the city, sharing with Despar Nord values such as sustainability, quality and a link with the territory.'

A replicable urban regeneration model

This new opening represents a virtuous model of urban regeneration, capable of combining the needs of modern distribution with respect for the historical heritage. A challenge won thanks to the shared vision between Despar Nord and Arneg, which once again confirms itself as a strategic partner for complex projects with high cultural, technological and social value.

Arneg S.p.A.

Founded in 1963 in the province of Padua, Arneg was established by Roberto Marzaro and Luigi Finco, who instilled in the company a foundation of solid principles and moral values rooted in the Veneto popular culture — best captured by Marzaro's motto: "Dream with courage, ethics, common sense, and imagination." Guided by this spirit, Arneg has grown steadily, committed to a development model that prioritizes environmental protection, energy savings, and respect for people. Today, it is a global leader in the design, production, and installation of commercial refrigeration systems and complete equipment for the retail sector. Arneg stands out in the market for its ability to deliver tailor-made solutions that combine high performance, sustainable innovation, energy efficiency, and Italian design.

The Arneg Group

Arneg is a leading international group in the design, production and installation of complete retail solutions. It is present worldwide with its main brands: Arneg, Incold, Intrac, Oscartielle, Frigo Tecnica Internazionale and, recently, also Frigomeccanica. The latter, a historic Italian company specialising in the Ho.Re.Ca. sector and in furnishings for bars, ice cream parlours, pastry shops and public premises, enriches the Group's offer by introducing a new market segment. With this acquisition, Arneg further consolidates its global presence, which today has 23 manufacturing companies and 21 trading and services companies and representative offices worldwide. This leadership is the result of close synergy between Group companies and the sharing of a common heritage of expertise, experience, and vision, supported by a widespread production and distribution network. Every decision made by the Group is aimed at generating tangible results: solutions that foster sustainable, long-term development while delivering real value for customers, communities, and the planet's future.
